Claims 1 to 11 are pending.

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

2. This application is in condition for allowance except for the following formal matters:

A....the title of the invention is not adequately descriptive. A new title is required that is more clearly indicative of the invention to which the claims are directed by making reference to the silicon arms doped with an impurity.

B...the abstract of the disclosure is objected to because the second sentence is awkward and should be rewritten as (for example) -- In the actuator in accordance with the present invention, a pair of silicon arms have their resistances lowered by being doped with impurities and are connected to each other by way of a glass substrate -- .

C...claims 1 to 11 are objected to because of the following informalities: claim 1 – line 4 is awkward and should be rewritten as (for example) -- respective end parts connected to opposite end faces of the --. Lines 6 to 8 are awkward and should be rewritten as (for example) -- each silicon arm provided at a surface, opposite from the surface connected to the insulating substrate, with a piezoelectric part --. Lines 9 to 11 should be similarly rewritten as -- each piezoelectric part provided with a first electrode at a surface opposite a surface facing the respective silicon arm --. Claim 2 should be rewritten as -- each silicon arm should be provided with a second electrode on the same surface that the respective piezoelectric part is formed on. Claim 8 – line 8, “to both” should be changed to -- to opposite --.

Art Unit: 2652
